

UNITED GREASE

An LJP Company

WE MAKE CIRCULAR SIMPLE™

United Grease is a leading recycler of bulk cooking oils, animal fats, and vegetable oils. A trusted partner to both local and international brands, United has a well-earned reputation for reliability, flexibility, and competitiveness.

Our industry-leading refining capabilities are extensive and unique.

We transform all types of fats and oils into high-quality ingredients for animal feed, cosmetics, renewable fuel and other products.

United offers specialized solutions that are unmatched in the industry. Collection and hauling for industrial food producers are just some of the many services we offer.

We de-package and recycle off spec, out of date, distressed or recalled products like **butters, margarines, shortenings, salad dressings, mayonnaise, packaged vegetable oils**, and many more fat based food products or ingredients. We can handle materials in bulk or in nearly any kind of container or packaging. In addition, **we offer competitive pricing on recycling of dissolved air flotation [DAF] residuals** from food related wastewater treatment systems.

Whether you're a food manufacturer, sustainability manager, distribution manager, warehouse manager, waste consultant, used cooking oil collector, grease trap service provider, or insurance claim specialist, United has a solution that meets your needs.
